CA8 INVENTION IS AN ADVANCE FOR THIS REASON.
 The invention relates to heterocyclic derivatives of formula (II), or pharmaceutically-acceptable salts thereof, which possess antitumor and antileukemic properties and are accordingly useful in methods of treatment of humans or animals. The invention also relates to processes for the preparation of the heterocyclic derivatives, to pharmaceutical compositions containing them and to their use in the manufacture of medicaments for use in the production of an antitumor or antileukemic effect. **ABSTRACT**
